

Partners, they have created the «Last Mile Logistics» fund, approved by the AMF, to address the issues and

This fund offers investors a recurrence of performance, and a long-term perspective of capital gains on real estate assets, through direct or indirect

challenges of delivery and storage in urban areas and city centers in France.

investments in buildings, including buildings in a state of future completion, mainly for the use of so-called «last mile» logistics.

The fund also aims to rehabilitate existing sites by integrating them into an ESG strategy, in order to obtain their certification.
